PATIENT IDENTIFICATION LABEL

**Indication:**

A focused ultrasound exam of the right lower quadrant was performed to evaluate for appendicitis in the patient. The ultrasound was performed with the following indications, as noted in the H&P:

- ☐ Abdominal pain
- ☐ Nausea / vomiting
- ☐ Fever
- ☐ Other indications as noted in the H&P

**Identified structures:**

Multiple real-time sonographic images were obtained of the right lower quadrant of the abdomen using curvilinear and/or linear multi Hertz transducers.

**Findings:**

Exam of the above structures revealed the following findings:

- Appendix visualized? ☐ Yes ☐ No
- If visualized, is the appendix compressible? ☐ Yes ☐ No
- If visualized, is the appendix dilated ( $\geq 8$ mm)? ☐ Yes ☐ No
- Is there any free fluid noted on exam? ☐ Yes ☐ No
- If free fluid noted, please quantify: ☐ Small ☐ Moderate ☐ Large

Other: \_\_\_\_\_

**Impression:**

- ☐ Normal right lower quadrant / appendix ultrasound, no evidence of appendicitis
- ☐ Appendix not visualized
- ☐ Appendix dilated and non-compressible, consistent with appendicitis
- ☐ Other: \_\_\_\_\_
